About

A Frontend Developer based in Indonesia who passionate about building user-friendly and visually stunning interfaces. In addition to my professional work, I enjoy writing blogs, contributing to open-source projects, and staying engaged with technology communities to continuously learn.

Experiences

Luarsekolah • Digital learning and career preparation platform   Bandung, Indonesia
Frontend Developer • Contract   Sep. 2024 – Present
- Revamped the main product app (luarsekolah.com) using Next.js (Pages Router), TypeScript, and Tailwind; improving maintainability and performance.
- Developing a B2B AI product platform using React, Vite, TypeScript, TanStack Query, Zod, and Tailwind; building the main dashboard and some of of reusable UI components for scalability and maintainability.
- Implementing GlitchTip for easier app debugging and error tracking.

Svara • Media and broadcasting platform   Bandung, Indonesia
Frontend Developer • Full-time   May 2023 – Aug. 2024
- Maintained an internal analytics dashboard using Next.js (Pages Router), TypeScript, React Query, and Material UI; which helps to provide analytics information for the company
- Set up GitLab CI/CD pipelines, reducing deployment time and increasing developer productivity.
- Designed and delivered a 7-week frontend internship curriculum, from HTML fundamentals to advanced Next.js, with practical assignments. Improving onboarding efficiency and technical readiness of new hires.

Dicoding • Online coding learning program and platform   Indonesia (Remote)
External Code Reviewer • Part-time   Apr. 2023 – Present
- Reviewing, providing solutions and suggestions to student's submissions (assignments) in some courses according to the given course target.
- In the courses forum discussion, help answer questions and provide solutions to students from courses who have difficulties, either it is about technical or non-technical.

Volunteer

Redooceit • End-to-end digital solution for managing household food waste   Indonesia (Remote)
Frontend Developer • Contract   Mar. 2025 – June 2025
- Revamped the company profile site using Next.js, TypeScript, Tailwind, and Sanity CMS; improving page load performance and enabling non-technical team to manage blog content.
- Developed a waste management dashboard using React, Vite, TypeScript, TanStack Query/Table, and Tailwind; which helps the admin, waste operator, and customers coordination workflows.
- Dockerized and implemented a GitHub Actions self-hosted CI/CD pipeline to VPS, accelerating deployments and improving team collaboration.

Education

Bachelor's Degree • **Telkom University**   Sep. 2023 – Present
Informatics • Online Learning
